

Tamar Organics

ORGANIC SEED CATALOGUE 2027

Dear Gardener,

Welcome to the 2027 seed catalogue from Tamar Organics, the UK's organic seed specialists. For a variety of reasons, we are offering a slightly slimmed down printed catalogue this year. Our usual larger range of seeds is still available on our website so if there is a favourite that you cannot find please feel free to contact us and we can add it to your order if it is available. Please just send your order on a clean sheet of paper. Remember to include your name, address and telephone number. Our address and details are on the back page.

With heat waves and hosepipe bans it has been a challenging year for many gardeners but hopefully everyone had some successes. In the Tamar garden we certainly had some challenges but many things such as tomatoes and peppers enjoyed the hot weather and we have good stocks of our own tomato and pepper varieties available this year. We trialled two **new Blight resistant TOMATOES** from the **ORGANIC OUTDOOR TOMATO PROJECT**. Bush varieties **VIVAORA** which is a golden yellow small oval tomato which had a really excellent taste, and **GUTINGI** which is a small red salad tomato. Both are available in this catalogue.

We continue our arrangement with **GARDEN ORGANIC** the UK charity dedicated to researching and promoting organic gardening, farming and food. We offer a 10% discount on seeds for members. For more information or to become a member go to www.gardenorganic.org.uk/join.

We continue to support the **JOLIBA TRUST**. The charity is based in central Mali which works on self-help projects amongst rural communities. We invite our customers to find out more about them at www.jolibatrust.org.uk.

Finally, thank you, once again, for your continued custom and support, and we wish everyone a happy and successful gardening year in 2027.

Happy Organic Gardening

ORGANIC GARLIC BULBS

Garlic is easy to grow and has relatively few pests and diseases to worry about. In general the largest and tastiest bulbs are obtained from autumn sown cloves, although spring planting varieties are better keepers. Plant individual cloves about 15 cm apart, just below the surface of the soil, The new bulb will be formed below the clove you plant. Approximately 130 cloves per kg.

SUBSTITUTIONS: In the event of an item being unavailable we will substitute the nearest equivalent item where possible. Refunds will be issued to make up the value if required. Please state clearly on your order form if this is not acceptable.

DELIVERY TIME: In most cases, goods will be dispatched within 2-3 days of receipt of order. However, during busy periods, deliveries may take longer and we ask you to allow 10 days for delivery. Certain orders may be held back to wait for fresh stock of certain seed items. If you have any concerns about your order please do not hesitate to call on 01579 371087 or email us at sales@tamarorganics.co.uk.

COLLECTION: Orders can be collected, by prior arrangement, from our premises at Rezare. Orders for collection can be placed over the telephone or by post and payment is due when goods are collected.

GROWERS: All seed varieties in this catalogue are available in larger pack sizes. A growers price list is available on request. Large pack prices are also on our website.

RETAILERS: Shops wishing to stock ORGANIC seeds should ask for our retailers letter which includes details of our trade discount scheme.

DISCOUNTS: Group discounts for allotment societies, garden clubs etc. are available on application. Please telephone for details or email sales@tamarorganics.co.uk.
